

## HART transparent driver

### 9107A

- 24 VDC supply via power rail or connectors
- Fast response time
- High active output load 725 Ohm / 20 mA
- Output line fault detection via status relay
- SIL2 certified via Full Assessment according to IEC 61508

#### Application

- 9107A is a 1- or 2-channel isolated 1:1 driver.
- Operation and drive control of I/P converters, valves and indicators.
- Operation of HART devices is possible as the unit transmits HART communication signals bi-directionally.
- 9107A can be mounted in the safe area or in zone 2 / Class I, Division 2, Groups A, B, C, D.
- The PR 4500 displays the process value for each channel and can be used to define high and low limits for detection of loop current level. If these limits are exceeded, the status relay will activate.
- Dual channel versions can be used for signal splitter applications - 1 in and 2 out.

#### Advanced features

- The PR 4500 detachable displays and the green and red front LEDs indicate operation status for each channel.
- A tag number can be defined for each channel.
- Output line fault detection.
- In the 1-channel version the status relay can be used as a simple limit switch.
- Suitable for the use in systems up to Performance Level "d" according to ISO-13849.

#### Technical characteristics

- High galvanic isolation of 2.6 kVAC.
- High accuracy better than 0.1%.
- Continuous check of vital stored data for safety reasons.

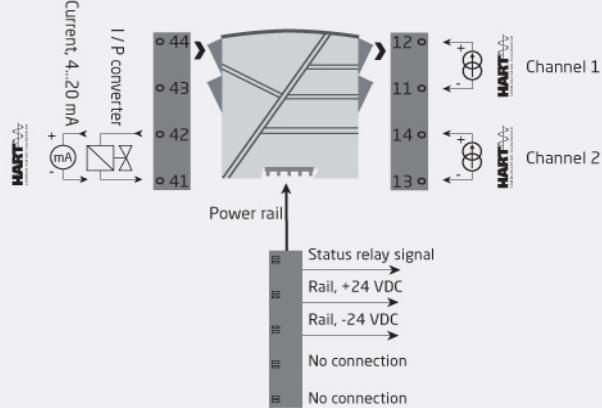

#### Mounting

- The devices can be mounted vertically or horizontally without distance between neighbouring units.

#### Applications

##### Output signals:

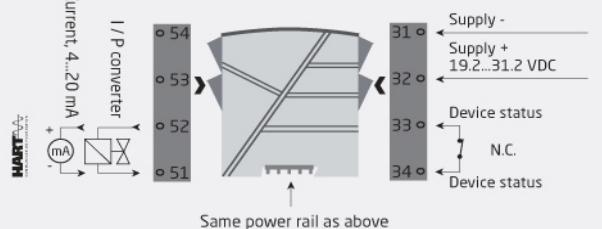

Channel 1

##### Input signals:

Analog, 4...20 mA

##### Channel 2

## Order

| Type  | Unit channels | I.S. / Ex approvals  |

## Environmental Conditions

|                              |  |
|------------------------------|--|
| Operating temperature.....   | -20°C to +60°C                                   |
| Storage temperature.....     | -20°C to +85°C                                   |
| Calibration temperature..... | 20...28°C  |
| Relative humidity.....       | < 95% RH (non-cond.)                             |
| Protection degree.....       | IP20   |
| Installation in.....         | Pollution degree 2 & meas. / overvoltage cat. II |

## Mechanical specifications

|                                    |   |
|------------------------------------|---|
| Dimensions (HxWxD).....            | 109 x 23.5 x 104 mm                                   |
| Dimensions (HxWxD) w/ PR 4500..... | 109 x 23.5 x 131 mm                                   |
| Weight approx.....                 | 250 g   |
| DIN rail type.....                 | DIN EN 60715/35 mm                                    |
| Wire size.....                     | 0.13...2.08 mm <sup>2</sup> AWG 26...14 stranded wire |
| Screw terminal torque.....         | 0.5 Nm  |
| Vibration.....                     | IEC 60068-2-6   |
| 2...13.2 Hz.....                   | ±1 mm   |
| 13.2...100 Hz.....                 | ±0.7 g  |

## Common specifications

### Supply

|                                       |                                   |
|---------------------------------------|-----------------------------------|
| Supply voltage.....                   | 19.2...31.2 VDC                   |
| Fuse.....                             | 1.25 A SB / 250 VAC               |
| Max. required power.....              | ≤ 1.0 W / ≤ 1.8 W (1 ch. / 2 ch.) |
| Max. power dissipation, 1 / 2 ch..... | ≤ 1.0 W / ≤ 1.8 W                 |

### Isolation voltage

|                                  |   |
|----------------------------------|---|
| Test /working: Input to any..... | 2.6 kVAC / 300 VAC reinforced isolation |
| Analog output to supply.....     | 2.6 kVAC / 300 VAC reinforced isolation |
| Status relay to supply.....      | 1.5 kVAC / 150 VAC reinforced isolation |

### Response time

|  |                                  |
|--|----------------------------------|
| Response time (0...90%, 100...10%).....                      | < 5 ms                           |
| Programming.....   | PR 4500 communication interfaces |
| Signal dynamics, input.....                                  | Analog signal chain              |
| Signal dynamics, output.....                                 | Analog signal chain              |
| HART bi-directional communication frequency range.....       | 0.5...7.5 kHz                    |
| Signal / noise ratio.....                                    | > 60 dB                          |
| Accuracy.....  | Better than 0.1% of sel. range   |
| mA, absolute accuracy.....                                   | ≤ ±16 µA                         |
| mA, temperature coefficient.....                             | ≤ ±1.6 µA / °C                   |
| Effect of supply voltage change on output (nom. 24 VDC)..... | < ±10 µA                         |
| EMC immunity influence.....                                  | < ±0.5% of span                  |
| Extended EMC immunity: NAMUR NE21, A criterion, burst.....   | < ±1% of span                    |

## Input specifications

### Current input

|   |               |
|---|---------------|
| Measurement range.....                            | 3.5...23 mA   |
| Sensor error detection: Loop break 4...20 mA..... | < 1 mA        |
| Input voltage drop, supplied unit.....            | < 2 V @ 23 mA |
| Input voltage drop, non-supplied unit.....        | < 4 V @ 23 mA |

## Output specifications

### Current output

|                              |                         |
|------------------------------|-------------------------|
| Signal range.....            | 3.5...23 mA             |
| Load (@ current output)..... | ≤ 725 Ω                 |
| Load stability.....          | ≤ 0.01% of span / 100 Ω |
| Current limit.....           | ≤ 28 mA                 |

### Status relay

|  |   |
|--|---|
| Relay function.....                        | N.C.                                    |
| Programmable low setpoint.....             | 0...29.9 mA                             |
| Programmable high setpoint.....            | 0...29.9 mA                             |
| Hysteresis for setpoints.....              | 0.1 mA                                  |
| Max. voltage.....                          | 125 VAC / 110 VDC                       |
| Max. current.....                          | 0.5 AAC / 0.3 ADC                       |
| Max. voltage - hazardous installation..... | 32 VDC / 32 VAC                         |
| Max. current - hazardous installation..... | 1 ADC / 0.5 AAC                         |
| of span.....                               | = normal measurement range<br>4...20 mA |

## Observed authority requirements

|              |                              |
