electronics

Privately held company *locally strong, globally present*

The specialist in signal conditioning devices and communication interfaces

PR electronics designs and produces signal conditioning (interface) devices for the process industry within temperature, I.S. interfaces, panel meters and signal conditioners. Our integrated development and manufacturing hub is located in Denmark. We sell our products globally through 9 sales subsidiaries and more than 40 distributors worldwide.

PR electronics is driven by engineers deeply committed to delivering leading-edge process instrumentation and we all share both our ambitious growth strategy and an entrepreneurial mindset.

We take great pride in seeing high-precision technology – produced in Denmark – integrated into process control applications, benefitting more than 10,000 customers worldwide.

Our value proposition: PERFORMANCE MADE SMARTER

To our distributors:

- Growth through complementary sales
- Diversified end-user and machine builder customer base
- Develop robust maintenance, repair and operation (MRO) business
- Dedicated technical training and sparring with industry experts
- Global network
- Part of a proven success

To your customers:

Install and forget

- 5-year warranty
- 99% on-time delivery
- 4 days standard lead-time
- Exceptional product quality
- > 89% customer satisfaction

Performance Made Smarter

- Easy to program
- Reliable and accurate
- Multifunctional devices
- Global approvals

Integrated *manufacturing*

- Designed and manufactured in Denmark
- Entire value chain in-house
- Significant investment in new products
- CO₂ neutral production

It all adds up - make the most of *every MRO opportunity*

Diversify your business across a vast number of end-users and machine builders within the process industry

Energy

Water & Wastewater

A very robust business model that does not rely on large projects to a few customers / segments, but sales of a few products (covering many applications) to many segments and customers.

Chemical

Oil & Gas

Metal & Steel

Marine

Pharmaceutical

Factory Automation

Cement

Pulp & Paper

Food & Beverage

The profile of a *great PR partner*

Passionate about instrumentation, growing your business and existing network within the process industry

The path to a mutually successful partnership

1

Selection:

Complementary products, market knowledge / access and courage to make an ambitious growth plan.

2

Onboarding:

PR invests significantly in training, you exhibit curiosity & capacity to learn and willingness to apply.

3

Partnership:

Through trust and transparency we regularly review our growth plan and support wherever necessary.

PR considers our distributors our colleagues – and treats them so. Our dedicated international area sales managers will go above and beyond to help you succeed. But you have to bring the desire, commitment and belief.

As partner in the Netherlands we join the benefits of PR electronics' professionalism. High level of intimacy in our relationship on many levels: Education, sales & marketing, strategy, logistic, quality and operation. It results in mutual commitment and focus on being successful with "their" products in "our" market now and in the near future.

Peter van der Bruggen
Sales Director, Vierpool B.V.

Benefit today from *PERFORMANCE MADE SMARTER*

PR electronics is the leading technology company that specializes in making industrial process control safer, more reliable and more efficient. Since 1974 we have been dedicated to perfecting our core competence of innovating high-precision technology with low power consumption. This dedication continues to set new standards for products that communicate, monitor and connect our customers' process measurement points to their process control systems.

Our innovative, patented technologies are derived from our extensive R&D facilities and our thorough understanding of our customers' needs and processes. We are guided by principles of simplicity, focus, courage and excellence, enabling some of the world's greatest companies to achieve PERFORMANCE MADE SMARTER.
